

Associate Analyst—Risk and Financial Advisory

At Deloitte, we do not offer you just a job, but a career in the highly sought-after Risk Management field. We are the business leader in the risk market. We work with a vision to make **the world more prosperous, trustworthy, and safe**. Our clients, primarily based outside of India, are large, complex organizations that constantly evolve and innovate to build better products and services. In the process, they encounter various risks and the work we do to help them address these risks is increasingly important to their success—and to the strength of the economy and public security.

By joining us, you will get to work with diverse teams of professionals who **manage operations** related to risk-centric solutions across a variety of risk domains for supporting global clients primarily based outside of India. In the process, you will gain exposure to the risk-centric challenges faced in today's world by organizations across a range of industry sectors and become subject matter experts in those areas and develop into a well-rounded professional who not only has the depth in few risk domains, but also has width of exposure to wide variety of risk domains.

Work you will do

You will have the opportunity to work on multiple projects across Risk and Financial Advisory.

You will have the opportunity to work across diverse Operating Portfolios and Industries, housed under Portfolio-wide, Operating Units. Our unique structure enables our professionals to specialize on their skills, while keeping our businesses agile to the current critical needs of our clients and capture developing opportunities in the evolving markets.

You will also gain exposure to multiple technology risk domains like access control, identity, authentication, cyber incident simulations, security testing, ethical hacking, cyber incident response, penetration testing, threat modeling, risk analytics, cloud application security, secure software, forensics, and IT controls to name some key areas.

In this role, you will build on your foundational expertise in technology and business to be able to **manage and operate** risk management programs, processes, and systems to address the growing challenges and risks our global clients face (including working for multi-geographic timezones).

Your experiences could include:

- Improving risk management operations by analyzing our clients' information technology (IT) controls and processes
- Supporting various live applications related to data privacy and security controls
- Provide managed services programs to address software vulnerabilities
- Establishing methods for monitoring "smart" devices connected to enterprise network
- Perform continuous monitoring and security analytics as part of SOC
- Handle incident response support, troubleshoot, problem solve, and simplify complex technical issues for clients as part of operations
- Assess clients' controls effectiveness to ensure high degree of reliability in safeguarding their mission critical assets

The team

We are strategic thinkers and technology experts who help our clients manage critical and complex business solutions with focus on risk management. Our professionals focus on deployment and maintenance of complex solutions for organizations that help address and manage risks and/or drives operational, financial, and regulatory compliance processes; as well as create solutions that manage the risk associated with the IT itself. We also make extensive use of data, statistical, and quantitative analysis; rules-based methods; and explanatory and predictive modeling in order to bring insights to client issues in the forensic and transaction domains.
